Bref historique de la société: Founded in 2010, Treenity Solutions is an all-inclusive IT services provider. We are a group of highly educated IT professionals with an obsession for providing outstanding quality services to our customers. Our staff is a carefully designed balance of seniority, technological expertise, ethnicity, gender and business background that allows us to deliver an impressive portfolio of complex projects in contrast with our medium size. We provide advice, assistance and services to your business or IT models in almost every aspect of products or projects developments lifecycles. Our methodology results from field experience gained on miscellaneous development and integration projects, especially on projects related to Business Intelligence and Custom solutions developments as well as the use of core proven methodologies on the market (mainly PRINCE2, CMMI, Agile/SAFe and ITIL). We are small but valuable, our staff concentrate a serious amount of competencies in a broad range of established (Microsoft, Java, PHP, BI) or emerging (BlockChain) IT technologies. No project is too complex or too small for us, we seek uncertainty because we thrive in delivering fast, cost effective, best technology solutions to our customers challenges. Outmatching our customer expectations in the longer term is well above expected quick margins in our business priorities

Chiffre d'Affaires: 2017: 3.200.000

Effectifs: 2017: 52

Chief Executive Officer: Elena Bulea

Mission: Mission of our management: We have a very lean organisational structure and we apply Lean Management principles to our way of conducting business: • Always define added value to the standpoint of our end customers • Continuous improvement of products, services and processes based on permanent incremental effort for efficiency. • Permanent focus on measuring performance of our processes and services Middle management is kept to a minimum and we use alternative methods such as horizontal career paths, self-managing teams, projects-based approaches whilst executive management focuses on internal controls and financial decisions.

Vision: Our vision is to become a critical partner for our customers and grow our portfolio of services offered. Our vision is centered on three permanent obsessional ideas: 1. Increase our workforce competencies and capabilities by permanent evaluation and training and hire exceptional individuals 2. Make our organisation performance a key concern in our two core organizational areas: recruitment and human resources management and products and service delivery 3. Focus on our business objectives to high customers and end-user's satisfaction Our values support our vision by promoting excellence, ensuring commitment and deliver added value and quality.

Valeurs: Integrity, Customer satisfaction, Performance, Teamwork, Corporate Social Responsibility.
